

1       **The Ohio State University Combined Consent to Participate in**  
2               **Research and HIPAA Research Authorization for spousal**  
3               **caregivers and noncaregiving adults**

4  
5       **Study Title: The CARE Study: Caregiving for a Spouse with a Memory Disorder**

6  
7       **Principal Investigator: Janice Kiecolt-Glaser, PhD**

8  
9       **Sponsor: National Institute on Aging, National Institutes of Health**

- 10  
11       • **This is a consent form for research participation.** It contains important information  
12       about this study and what to expect if you decide to participate. Please consider the  
13       information carefully. Feel free to discuss the study with your friends and family and  
14       to ask questions before making your decision whether or not to participate.
- 15       • **Your participation is voluntary.** You may refuse to participate in this study. If you  
16       decide to take part in the study, you may leave the study at any time. No matter what  
17       decision you make, there will be no penalty to you and you will not lose any of your  
18       usual benefits. Your decision will not affect your future relationship with The Ohio  
19       State University. If you are a student or employee at Ohio State, your decision will  
20       not affect your grades or employment status.
- 21       • **You may or may not benefit as a result of participating in this study.** Also, as  
22       explained below, your participation may result in unintended or harmful effects for  
23       you that may be minor or may be serious depending on the nature of the research.
- 24       • **You will be provided with any new information that develops during the study**  
25       **that may affect your decision whether or not to continue to participate.** If you  
26       decide to participate, you will be asked to sign this form and will receive a copy of the  
27       form. You are being asked to consider participating in this study for the reasons  
28       explained below.

29  
30       **Key Information About This Study**

31       The following is a short summary to help you decide whether or not to be a part of this study.  
32       More detailed information is listed later in this form.

33  
34       This study focuses on how the stresses of caring for a spouse or partner with a memory  
35       disorder affects the immune system (certain kinds of white blood cells that protect against  
36       infections and cancer), as well as risk for depression and anxiety problems. Participants will  
37       either be living with a spouse or partner who has a previously diagnosed memory disorder  
38       (“caregivers”), or they will take part as a “control” or noncaregiving participant, that is, a  
39       person who is married/partnered but who is NOT providing any care to an impaired family  
40       member. Data from caregivers and noncaregivers will be compared to see if there are  
41       differences related to the stresses of caregiving.

**1. Why is this study being done?**

To help scientist and physicians understand how longer-term stress affects the immune system.

**2. How many people will take part in this study? 546**

**3. What will happen if I take part in this study?**

At your first visit you will be interviewed, you will complete questionnaires, and you will have your blood drawn. About a year after your initial interview, you will have a second appointment, and a final appointment a year after that. At each of these annual appointments, blood samples will be again be drawn, and you will complete questionnaires and participate in interviews; these appointments will take 2-2.5 hours. Each of the procedures is described in more detail below.

At each of these annual visits 2.37 oz., or just over 1/4 cup of blood will be drawn from your arm to be used for immunological studies. The total amount that will be drawn across 2 years for the entire study will be 7.11 oz, or just under a cup, with at least 10 months between blood draws.

In the first interview you will be asked about depression and anxiety symptoms and health problems experienced over your lifetime; in subsequent years after the first visit, you will be asked about depression and anxiety symptoms and physical health problems experienced during the year since the last interview. The interviews will be audiotaped; the tapes will be stored online in a secure site, and will be erased once they have been transcribed (typed) and coded.

At each yearly appointment you will be asked to complete questionnaires with questions of a personal nature regarding your medications, health conditions, mood, feelings, health behaviors, personality, and your relationship with your partner.

At the end of each annual appointment, as part of standard procedures, you will be given a list of psychological counseling services should you wish to talk with someone at that time or in the future about any problems you're having.

You will be asked to perform simple physical performance tasks to assess frailty (weakness). To assess grip strength, you will be asked to squeeze a handheld device.

Women who are pregnant or nursing cannot participate in this study. If you believe you may be pregnant, please inform the researchers.

We will request your spouse/partner's permission to access his/her medical records related to memory changes.

86 No medical report will be added to your medical records based on any part of research  
87 participation. Blood samples will not have identifying information such as name, initials, or  
88 address, only a code number. The blood samples will be stored with the same code number  
89 that is used on all the questionnaires and other forms that have been completed; the results of  
90 the testing will be kept confidential and will not be released. Names and other identifying  
91 information will be kept separate from the samples. Your name will not be in any publications  
92 or reports about this research; only group results, with no personal code number or other  
93 identifiers, will be reported.

94

95 **4. How long will I be in the study?**

96 You will have three appointments spread across two years. Each appointment will take 2 to  
97 2.5 hours.

98

99 **5. Can I stop being in the study?**

100 You may leave the study at any time. If you decide to stop participating in the study, there  
101 will be no penalty to you, and you will not lose any benefits to which you are otherwise  
102 entitled. Your decision will not affect your future relationship with The Ohio State  
103 University.

104

105 **6. What risks, side effects or discomforts can I expect from being in the study?**

106 With the blood draws you may experience bruising at the draw site, infection, pain, and  
107 fainting. Personal questions from the interviews and questionnaires may make you  
108 uncomfortable or could produce stress. Should you reveal suicidal intent, investigators are  
109 required to evaluate risk and may contact appropriate authorities if you appear to be at  
110 imminent risk for harm to yourself or others. We are required by law to report child and/or  
111 adult abuse.

112

113 **7. What benefits can I expect from being in the study?**

114 There are no direct benefits you can expect from being in the study. However, your  
115 participation will help scientists and physicians understand the toll that stress takes on the  
116 body.

117

118 **8. What other choices do I have if I do not take part in the study?**

119 You may choose not to participate without penalty or loss of benefits to which you are  
120 otherwise entitled.

121

122 **9. What are the costs of taking part in this study?**

123 There are no costs for taking part. If you have to park for a study visit, we will cover the cost  
124 of your parking at the medical center.

125

126 **10. Will I be paid for taking part in this study?**

127 You will receive \$60 for your time for your first visit, \$65 for your second visit, and \$70 for  
128 your third visit.

129

130 By law, payments to participants are considered taxable income.

131

132 **11. What happens if I am injured because I took part in this study?**

133 If you suffer an injury from participating in this study, you should notify the researcher or  
134 study doctor immediately, who will determine if you should obtain medical treatment at The  
135 Ohio State University Wexner Medical Center.

136

137 The cost for this treatment will be billed to you or your medical or hospital insurance. The  
138 Ohio State University has no funds set aside for the payment of health care expenses for this  
139 study.

140

141 **12. What are my rights if I take part in this study?**

142 If you choose to participate in the study, you may discontinue participation at any time  
143 without penalty or loss of benefits. By signing this form, you do not give up any personal  
144 legal rights you may have as a participant in this study.

145

146 You will be provided with any new information that develops during the course of the  
147 research that may affect your decision whether or not to continue participation in the study.

148

149 You may refuse to participate in this study without penalty or loss of benefits to which you  
150 are otherwise entitled.

151

152 An Institutional Review Board responsible for human subjects research at The Ohio State  
153 University reviewed this research project and found it to be acceptable, according to  
154 applicable state and federal regulations and University policies designed to protect the rights  
155 and welfare of research participants.

156

157 **13. Will my de-identified information (and bio-specimens) be used or shared for  
158 future research?**

159 Your de-identified information might be shared with other researchers at the end of this study  
160 if requested. The researchers would not know your name, your address or phone number, or  
161 any other information that would identify you.

162

163 **14. Will my study-related information be kept confidential?**

164 Efforts will be made to keep your study-related information confidential. However, there may  
165 be circumstances where this information must be released. For example, personal information  
166 regarding your participation in this study may be disclosed if required by state law.

167

168 Also, your records may be reviewed by the following groups (as applicable to the research):

- 169 • Office for Human Research Protections or other federal, state, or international  
170 regulatory agencies;
- 171 • U.S. Food and Drug Administration;
- 172 • The Ohio State University Institutional Review Board or Office of Responsible  
173 Research Practices;

- 174       • The sponsor supporting the study, their agents or study monitors; and  
175       • Your insurance company (if charges are billed to insurance).

176  
177 If we find information that significantly impacts your health, we will share it with you. If a  
178 complete blood count is performed and we find abnormalities, we will notify you by a phone  
179 call or an email.

180  
181 The National Institutes of Health (NIH) issues Certificates of Confidentiality for all NIH-  
182 funded studies, including this study. This Certificate provides extra protection for you and  
183 your study information, documents, or samples (blood, tissue, etc.). The Certificates are  
184 issued so that we cannot be required to disclose any identifiable information collected about  
185 you as a part of this study in a lawsuit or legal proceeding. This is a layer of protection over  
186 and above the already existing protections in place for you and your information, documents,  
187 or samples.

188  
189 However, these protections do not apply in some situations. For example, we may have to  
190 release your information if a law requires us to do so, if NIH requests the information, or if  
191 the FDA tells us to release this information.

192  
193 Please talk to your study team, or contact the Office of Responsible Research Practices at  
194 614-688-8641, if you have questions.

195  
196 Please visit the NIH website at <https://humansubjects.nih.gov/coc/faqs> to learn more.

197  
198 **15. HIPAA AUTHORIZATION TO USE AND DISCLOSE INFORMATION FOR**  
199 **RESEARCH PURPOSES**

200  
201 **I. What information may be used and given to others?**

- 202  
203       • Research records;  
204       • Records about phone calls made as part of this research;  
205       • Records about your study visits;  
206       • Information that includes personal identifiers, such as your name, or a number  
207       associated with you as an individual;

208 **II. Who may use and give out information about you?**

- 209       • Researchers and study staff.

210  
211  
212 **III. Who might get this information?**

- 213  
214       • The sponsor of this research. “Sponsor” means any persons or companies that are:  
215           • working for or with the sponsor; or  
216           • owned by the sponsor.

- 217
- 218
- 219
- 220
- 221
- Authorized Ohio State University staff not involved in the study may be aware that you are participating in a research study and have access to your information;
  - If this study is related to your medical care, your study-related information may be placed in your permanent hospital, clinic, or physician's office record;

222 **IV. Your information may be given to:**

223

- 224
- 225
- 226
- 227
- 228
- 229
- 230
- 231
- 232
- The U.S. Food and Drug Administration (FDA), Department of Health and Human Services (DHHS) agencies, and other federal and state entities;
  - Governmental agencies in other countries;
  - Governmental agencies to whom certain diseases (reportable diseases) must be reported; and
  - The Ohio State University units involved in managing and approving the research study including the Office of Research and the Office of Responsible Research Practices.

233 **V. Why will this information be used and/or given to others?**

234

- 235
- 236
- 237
- 238
- To do the research;
  - To study the results; and
  - To make sure that the research was done right.

239 **VI. When will my permission end?**

240

241 There is no date at which your permission ends. Your information will be used

242 indefinitely. This is because the information used and created during the study may be

243 analyzed for many years, and it is not possible to know when this will be complete.

244

245 **VII. May I withdraw or revoke (cancel) my permission?**

246

247 Yes. Your authorization will be good for the time period indicated above unless you

248 change your mind and revoke it in writing. You may withdraw or take away your

249 permission to use and disclose your health information at any time. You do this by

250 sending written notice to the researchers. If you withdraw your permission, you will not

251 be able to stay in this study. When you withdraw your permission, no new health

252 information identifying you will be gathered after that date. Information that has already

253 been gathered may still be used and given to others.

254

255 **VIII. What if I decide not to give permission to use and give out my health**

256 **information?**

257

258 Then you will not be able to be in this research study and receive research-related  
259 treatment. However, if you are being treated as a patient here, you will still be able to  
260 receive care.

261  
262 **IX. Is my health information protected after it has been given to others?**

263  
264 There is a risk that your information will be given to others without your permission. Any  
265 information that is shared may no longer be protected by federal privacy rules.

266  
267 **X. May I review or copy my information?**

268  
269 Signing this authorization also means that you may not be able to see or copy your study-  
270 related information until the study is completed.

271  
272  
273 **16. Who can answer my questions about the study?**

274 For questions, concerns, or complaints about the study, or if you feel you have been harmed  
275 as a result of study participation, you may contact Janice Kiecolt-Glaser PhD at 614-293-  
276 3499, Institute for Behavioral Medicine Research, Ohio State University College of Medicine,  
277 460 Medical Center Dr, Room 130, Columbus, Ohio 43210-1257

278 For questions related to your privacy rights under HIPAA or related to this research  
279 authorization, please contact the HIPAA Privacy Manager, The Ohio State University  
280 Medical Center, Suite E2140, 600 Ackerman Road, Columbus, Ohio 43202

281  
282 For questions about your rights as a participant in this study or to discuss other study-related  
283 concerns or complaints with someone who is not part of the research team, you may contact  
284 the Office of Responsible Research Practices at 1-800-678-6251.

285  
286 If you are injured as a result of participating in this study or for questions about a study-  
287 related injury, you may contact Janice Kiecolt-Glaser PhD at 614-293-3499.

288  
289 **Signing the consent form**

290  
291 I have read (or someone has read to me) this form and I am aware that I am being asked to  
292 participate in a research study. I have had the opportunity to ask questions and have had them  
293 answered to my satisfaction. I voluntarily agree to participate in this study.

294  
295 I am not giving up any legal rights by signing this form. I will be given a copy of this  
296 combined consent and HIPAA research authorization form.
